Single, 5 ft 9, Green & Democratic morality, 27.

Hobbies: Blogger & Market Research

Psychological information: Ashton De Roy is a Special Needs Autistic person from a poor family background.

Creative works:

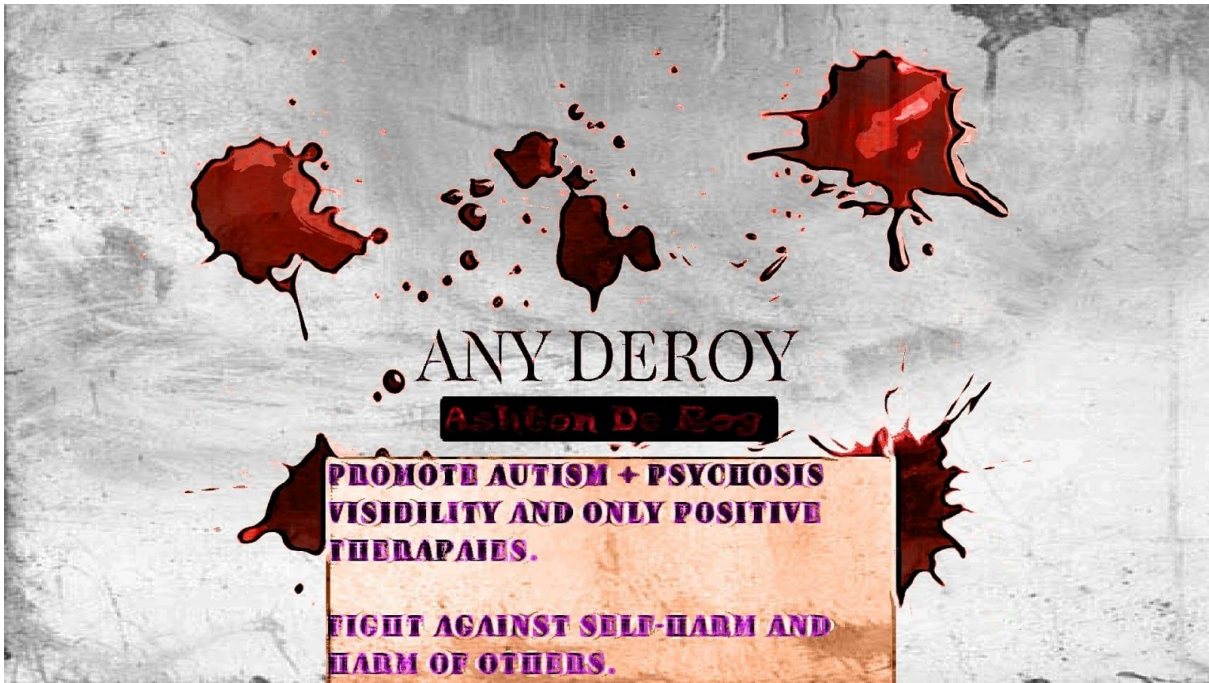

DEROY COLLECTIVE
.family

Family psychology: Ashton De Roy is from a family with no clear defined morality. Hence the use of the Eagle in the logo. To Ashton De Roy it represents their grandfather's love for Indigenous people. To everyone else it might represent Libertarian values. This makes them particularly hazardous as Ashton De Roy can not go camping with poorly established psychological considerations including medication and re-establishing Social norms, use a gun or get in fist fights. As they have a tendency to push beliefs of abstract Nihilism and Emotional release therapies which to a pervasive Developmental disorder are in fact dangerous.

After a Conflict: The family has to use a Healthcare worker, Therapist or Paramedic to redo family ties. Ashton De Roy has Autism Psychosis and should not be triggered away and brought back casually as this is a dangerous way of operating a family culture.

Proof of Psychotic artwork:

Details of God Complex: Ashton De Roy is an Autistic victim of Sexual assault in 2011. Therefore Ashton De Roy has legal rights to use referencing to Psychotherapy. CPTSD is a condition shared with people in the Military & Healthcare workers. Ashton De Roy uses psychedelic therapies on anyone they believe suffers with the affliction.
